<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
Eden Lane Bridge over Whippany River	NS9908	NS9908

The existing structure was built in 1972 as a temporary single-span structure. The bridge consists of simply supported steel acrow panel trusses and is supported on concrete abutments. The bridge has inadequate deck geometry and substandard lane widths. The existing metal bridge deck components are overstressed (under-designed). This bridge is considered structurally deficient and functionally obsolete and hence is in need of replacement. The new structure will provide two 3.65 meter lanes, adequate shoulders on both sides, one sidewalk and will be constructed on an improved alignment.

<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
<b>Green Pond Road Bridge over Hibernia Brook</b>	<b>NS0008</b>	<b>NS0008</b>

The existing structure will be replaced on approximately the same footprint at the existing bridge. A temporary bridge will be installed on the west of the existing bridge to provide for detour traffic during construction. The new approach roadway will consist of two 12-foot lanes with six-foot shoulder on each side. The roadway will have a six-foot berm area with 2 to 1 side slopes to meeting the existing conditions. A six-foot sidewalk will be constructed 150 feet north of the bridge and 350 south of the bridge. Some roadway reconstruction of School Road and Lower Hibernia Road is anticipated to meet Green Pond Road. The new bridge will be a 62-foot single span steel girder section with a composite concrete deck, or a prestressed concrete box beam section.

<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
<b>Inamere Road Bridge over Whippany River</b>	<b>NS0007</b>	<b>NS0007</b>

Improvements will include replacement of the existing Structure No. 1400790 and the widening of Structure No. 1400791 on the north side, realignment of the approach roadways in the immediate vicinity of the structures and resurfacing the existing roadway. This project includes improvements approximately 550 feet north of the center of the bridge. The road will be widened to two 12-foot lanes, two 6-foot shoulders, one 6-foot sidewalk on the eastern side and two parapet walls, 2 feet wide on either side, making a total roadway width of 46 feet. The Morris County Park Commission requested a sidewalk be included in this project to provide pedestrian access from the existing sidewalk at the Township of Morris Municipal Swimming Pool to Patriot's Path, approximately 800 feet north of the swimming pool as an enhancement to their park property.

Rockaway Road Bridge over NJ TRANSIT	9183	9183

The subject structure, built in 1927, is rated as critical. The structure will be replaced with a new structure on approximately the same alignment as the existing structure. The project will include construction of two 3.6 meter traffic lanes, two 3.0 meter shoulders, roadway curbing and a west sidewalk along the southern approach to the Franklin Road intersection. To the north, the shoulders and sidewalk must terminate at the Blackwell Street intersection. This project will be bicycle/pedestrian compatible.

<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
<b>CR 617      Sussex Turnpike</b>	<b>L070</b>	<b>L070</b>

This project provides for reconstruction, minor widening for shoulder improvements, minor realignment, drainage improvements and traffic signal improvements along Sussex Turnpike from Black River (Route 10) to just east of West Hanover Avenue, for a total length of approximately 4.3 miles. The project also includes the minor realignment of the intersection of West Hanover Avenue and Brookside Road as well as a widening from two to four lanes (with no shoulders) from Calais Road to West Hanover Road. When completed, Sussex Turnpike from Route 10 to Calais Road will be one 12-foot lane in each direction with 6-foot shoulders. Sussex Turnpike from Calais Road to just east of West Hanover Avenue will be one 11-foot lane and one 12-foot lane in each direction with no shoulders. There will be 12-foot dedicated left-turn lanes on eastbound Sussex Turnpike at Millbrook and West Hanover Avenues. There will also be a dedicated 12-foot left-turn lane on westbound Sussex Turnpike at Calais Road.

Construction will be multi-year funded under the provisions of Section 13 of P.L. 1995, c.108.

<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
<b>10 Powder Mill Road</b>	<b>00344</b>	<b>00344</b>

This project will provide for operational improvements at Powder Mill Road. A new loop ramp will be constructed in the northwest quadrant of the intersection to accommodate Route 10 westbound traffic destined to Powder Mill Road southbound or Route 10 eastbound (U-turn). The existing forward jughandle from Route 10 westbound will be reconfigured to permit right turns only (access to Powder Mill Road northbound). Route 10 will be widened at the intersection to accommodate an exclusive turn lane for the existing ramp and the new ramp. Construction of a 10-foot shoulder adjacent to the eastbound lanes will provide additional safety. The rock outcrop along Route 10 eastbound immediately west of the intersection will be stabilized. Powder Mill Road north of Route 10 will be widened to accommodate a longer left-turn lane. This project will be bicycle/pedestrian compatible.

<b>206 CR Main Street (Route 24), Chester, 24/513 intersection improvements</b>	<b>94044</b>	<b>94044</b>

This project will improve the Route 206/CR 24/513 intersection by adding a left-turn lane in each direction on Route 206. There are no plans to widen CR 24/513. Unless provided by others, the project will also include the addition of a traffic signal and left-turn lanes in each direction in the vicinity of MP 86.85 (shopping center entrance). Provisions will also be made for an unsignalized southbound left-turn lane into Colby Farm Road in Chester Township at approximately MP 86.55. Route 206 will have 15-foot outside lanes which are bicycle compatible. The intersection of Route 206/CR 24/513 will include improved pedestrian crossings. The project will also include sidewalks along Route 206 (replacement of existing sidewalks as well as supplemental sidewalks).
